

Knowledge Graph Engineer

Starting now, Vienna, part-time (16-30 hours/week), m/f

Are you interested working in the trending emerging market field of Chatbots and Voice Assistants?

Onlim (www.onlim.com), one of the leading chatbot and voice assistant platform and solution providers in DACH, is searching for a smart & hungry Knowledge Graph Engineer to join our agile international team. As a KG engineer you will have to search for and integrate data sources that provide an added value to our existing KGs. The KGs are used to power our digital text and voice assistants.

Requirements:

- Ability to work with various data formats (JSON, CSV, XML, RDF)
- Ability to understand and extract how information is modelled and represented in the data
- Experience in data integration or mapping
- Ability to search for datasets and integrate them into a coherent schema
- Motivation to details & semantics (solving corner cases, inspecting data in detail)

Qualifications:

- at least a bachelor degree
- Knowledge in java or python

Preferred Qualification:

- Experience in Semantic Web technologies

Interested?

We are looking forward to your application.
